JOB EXPERIENCE

Habultron d.o.o | Full stack developer

8 Months | Angular 2+, PHP, MySQL

TECH STACK

JavaScript (Angular 2+ & React)

NodeJS, Express, PHP, Java, C#

MongoDB, MySQL, HTML, CSS

PERSONAL SOFTWARE PROJECTS

Imgsrch | Image search + reverse image search app

Full Stack | <https://imgsrch-app.herokuapp.com>

React, Webpack, NodeJS, Express

- Built infrastructure of project – created Express server to serve static Webpack bundled files. Used React framework to create component based UI structure.
- Implemented Unsplash API for fetching fast asynchronous image requests.
- Added reverse image search with DeepAI API (search similar images by uploading image).
- Designed and developed UI.

Sharecode | Code sharing + live pair coding platform

Full Stack | <https://sharecode-app.herokuapp.com/>

HTML, CSS, JavaScript, NodeJS, Express, Socket.io, MongoDB

- Created a full front-end and back-end system using an Express server to handle routing and EJS template to display dynamic content on pages.
- Used MongoDB non-relational database to store users and code projects.
- Created a fully functional authentication and authorization system with PassportJS.
- Used Socket.io to make a fast and reliable live pair programming feature.
- Website design and logo are also done by me.
